Notes:

^[8] For years 2009-2011, rates have been recalculated following the dissemination of the indicator “Population by address on July 1st”.

^[9] For years 2012-2014, rates for 1,000 inhabitants have been calculated by resident population on July 1st of every year, estimated in conditions of comparability with the final results of the Population and Homes Census – 2011.

^[10] Intermediary data.

Notă:

^[13] Rates have been calculated for the number of live births from Romania. For that reason, data is not comparable with preceding years.

^[14] Starting with year 2014, only live births with usual residence in Romania are taken into account.
